

Incredibly Efficient. Remarkably Easy to Fly.

## Reduce your travel time

The Eclipse Jet allows you to leave your office or home on your schedule. There is no need to worry if a meeting goes long; your jet will wait for you. And you won't have to reserve time for security checkpoints and long, exhaustive walks through large airports. By conducting your flights from one of 5,000+ US airports, you will save yourself lengthy drives from commercial airline hubs.

## Travel quickly and efficiently

The Eclipse Jet travels at speeds up to 430 mph (375 knots), moving you between locations with the utmost efficiency, allowing you to spend less money and energy. Did we mention that the Eclipse Jet is the quietest twin-engine jet in general aviation? This means that you and your team can carry on conversations between locations, discussing strategies or reviewing meeting notes, increasing your team's production.

## Spend less getting more done

With budgets being squeezed and everyone wanting to do more with less, the Eclipse Jet brings tremendous capability at a surprising cost.

**Cost of Acquisition** The Eclipse Jet has the lowest acquisition cost of any jet on the market, allowing you to achieve jet speeds at the purchase price of a turboprop! Priced hundreds of thousands of dollars less than our closest jet competitor, the Eclipse Jet will show the world that you are being careful with your transportation budget.

**Cost of Flying** The Eclipse's P&WC engines consume less fuel in an hour's flight than some jets consume taxiing for takeoff. With the lowest direct operating costs and fixed annual costs of any jet on the planet — the Eclipse Jet will save you money every time you start the engines.

**Cost of Ownership** The Eclipse keeps your recurring costs low, whether it be hangar, insurance, or training. Every aspect of the airplane has been optimized for cost reduction.

**Cost to the Environment** The Eclipse Jet gives back to the environment every time it flies. By using such small quantities of fuel, the Eclipse Jet leaves a minimal carbon footprint. We strive to be environmentally friendly, and are proud of our record.

## Performance by Numbers

Max Cruise Speed:	375 kt
NBAA IFR Range w/ 4 Occupants:	1,125 nm
Max Altitude / Ceiling:	41,000 ft
Cruise Fuel Flow:	48 - 59 gph
Available payload w/ Max Fuel:	636 lbs
Takeoff Distance:	2,433 ft
Landing Distance:	2,790 ft
Time to Climb to 41,000 ft:	29 min
All Engine Rate of Climb:	3,424 fpm
One Engine Inop. Rate of Climb:	989 fpm
One Engine Inop. Service Ceiling:	35,000 ft

## To Purchase an Eclipse 550

To purchase a new production Eclipse Jet, the Eclipse 550, contact the Eclipse Aerospace Customer First Team at 877.375.7978, by email at [sales@eclipse.aero](mailto:sales@eclipse.aero), or through our website, [www.ECLIPSE.aero](http://www.ECLIPSE.aero).
